

Strict json_schema decision format (live_model.mjs)

VISIBLE to model

- query
- candidate memories (id+content)
- active_message (C5 only)
- protocol_rule

HIDDEN oracle (scoring)

- expected_memory_ids
- forbidden_memory_ids
- binding metadata
- source hashes

decision: { selected_memory_ids, answer, confidence, needs_review, selected_evidence }

scored by locked script; candidate ids anonymized where content is neutral
